COUNTY AGENT IS FARM PHYSICIAN

MORE THAN 1,000 AT WORK

Nation-Wide System of Instruction Result of Co-operation by Uncle Sam.

A new personage in the rural life of the United States is the county agent. It has been through the county agent in the past few years that Uncle Sam has been distributing the stored up knowledge that has been acquired through years of research work by the government agricultural experts and it is through the county agent that Uncle Sam expects to further expand the great educational work that is being done among the farmers and their families throughout the country.

The county agent is the agricultural general physician of his neighborhood. If a farm is sick and run down, he visits it, diagnoses the cause and prescribes the remedy.

The nation-wide system of agricultural instruction, in which the county agents play so important a part, has been made possible by co-operation between Uncle Sam and the various States and counties.

During the last fiscal year nearly \$5,000,000 has been spent in the furtherance of this enterprise. Of this sum a little more than \$2,000,000 came from the United States treasury; about \$1,200,000 from the various State treasuries; a little less than \$1,000,000 from county moneys; \$225,000 from the State agricultural colleges and the remainder from miscellaneous sources.

Year by year for seven years, more federal money becomes available under the terms of the agricultural extension act. If the States contribute the share required of them, more than \$8,000,000 will be spent annually by the final year 1922.

Nearly \$2,500,000 of the extension funds, or more than one-half of the total, is used to carry on the work of county agents.

More Than 1,000 Agents.

There are now more than one thousand of these agents and their number grows steadily as the farmers come to appreciate the value of their service.

A county agent is a sort of a deputy secretary of agriculture. He is the joint representative of the local community, the state college and the department of agriculture. Through him the neighborhood, the State and the nation give their help to all the farmers in the county.

This help is varied and the list of the county agents' activities is a long one. They supervise the construction of silos, assist in the importation of purebred stock, demonstrate the use of serums for the control of hog cholera, anthrax, black-leg and other animal diseases, further the work of tick eradication, plan terracing and drainage systems, give demonstrations in the use of lime and the mixing of fertilizers, organize cow-testing associations, promote the formation of co-operative purchasing and marketing associations, help the farmers in their book-keeping.

The county agent is the connecting link between scientific and commercial agriculture. It is his task to pour over the land the treasures of the once-despised "book farming."

The work, however, is not confined to farming alone. The agricultural extension act expressly provides that a part of the money appropriated in accordance with its terms shall be spent in giving to women the same assistance in their problems that the men receive in theirs.

It has been thoroughly realized that the production of crops—even the production of crops at a profit—is not the sole purpose of life in the country. The farmer, it is true, must produce to live, but he does not live solely to produce. The comfort, the health, the welfare and the happiness of the family depends on many other things than the yield of his fields and herds.

Many Women Agents at Work.

Nearly four hundred woman county agents are now at work in 15 Southern States.

Moreover, anything which benefits the children is of vital interest and benefit to rural women. The work for boys' corn clubs, pig clubs and poultry clubs, as well as that in such organizations as the peanut, baby-beef and potato clubs for farm boys and farm girls, directly touches the home, and hence operates to the interest of rural mothers, daughters and wives.

There are over five thousand women who have volunteered to co-operate with the department of agriculture and the state colleges in promoting this work. Many women are giving a large part of their time without compensation. The last available figures show an enrollment of 250,000 young people in the various progressive-agriculture clubs under the direction of county agents and woman demonstrators, assisted by volunteer experts of both sexes. The volunteer work is increasing in scope, and it is probable that before long 50,000 women will be working in direct co-operation with the department of agriculture and the State agricultural agencies to promote the practice of scientific agricultural methods.

QUESTIONS EACH SHOULD ANSWER

The following article written for the Rock Hill Record by Jno. T. Roddey, who is well known and admired by many people in Lancaster and vicinity, will, we believe, prove very interesting to the many readers of The News:

To the Editor of The Record:

There are many remarks that are made to a man in his every-day life which necessitate his thoughts taking possibly a queer turn; yet, at the same time, the remarks cannot be ignored, and it is difficult for any man to control his own thoughts. For instance, the other day, a gentleman said he could leave his back door or his corn crib open in the country, but if he had anything very valuable he would want it in a good safe under lock and key. This brings up the question: Have conditions improved? Is the world growing better? Is there less whiskey drinking and intoxication among what is termed the lower classes? Is there less crap shooting, poker playing, and minor gambling among the same classes? Is there less petty stealing among the so-called lower type of both negroes and whites, and are the petty thefts the smallest in numbers for years? In other words, to sum it up, have the drunkards, the small gamblers, and the petty thieves, what one might term the lower classes, improved?

Is there less confidence and trust in our fellow-man and more necessity for "putting in writing" every transaction where a dollar is involved? Can a man get business advice in the majority of cases where the adviser does not consider his own personal interest first?

Is there more falsifying, deception and "tricks of the trade" in the so-called upper classes?

Could a young man have danced some of the present day dances 25 years ago without getting shot, or could a woman have dressed in some of the present day styles and been respected?

Is the "Almighty Dollar" to a very great extent taking the place and thoughts of the Almighty God, and is modesty being put in the background? Is there more hypocrisy, more men trying to deceive themselves and everybody else, and more women under the wrong impression as to man's ideas of the highest types of womanhood? Is a man who trusts nobody, believes nobody, associates as little as possible with anybody, except for possible profit, the successful admired man of today? In other words, to sum it up, have the so-called upper classes gone backward?

If the lower classes have gone forward, and the upper classes have gone backward, how long will it be before they meet, or have they already met, if God Almighty were to be the Judge, and does the Bible say He is? How would He judge a woman with a modest calico or gingham dress, and a woman with immodest

silks and satins?

How would He judge a poor, honest, shabbily dressed laborer and a rich, dishonest, finely-dressed liar? How would He judge an ignorant drunkard brought up with the bad environments and having had no advantages, with the very-day hypocrite brought up with all advantages?

Are there laws made and enforced for the crap shooter, small gambler, petty thief, whiskey seller and whiskey seller and whiskey drinker?

Are there any laws for lying, hypocrisy, trickery and deception for profit?

Is one considered "poor devil," he should have known better," and the other a smart, shrewd, calculating business man?

I do not state, or know positively, that any of these questions represent the real conditions. Every one, of course, has his own ideas and is his own judge.

JOHN T. RODDEY.

Tonoline Is Beauty Aid Announces Specialist.

Mildred Louise Talk of Interest to Women.

As health is a first aid to beauty this story, told by Mildred Louise, beauty specialist, of Boston, Mass., is of unusual interest.

"I can recommend no better health giver than tonoline," said Mildred Louise.

"I was for many months a victim of stomach trouble and nervousness. I had suffered terribly from pains that followed eating. Headaches also would add to my worries. Poor digestion finally brought on nervousness.

"Relief came, however, when I took the advice of several women who said, 'Take tonoline.'

"Not long after I started the tonoline treatment, my patrons began to remind me of the improvement in my condition. And because health is the quickest way to beauty, the improvement was particularly noticeable in my face.

"What tonoline really did for me I cannot say. I am so grateful that I am very willing to recommend tonoline publicly."

Tonoline is a purely vegetable preparation which goes to the seat of common maladies—stomach and kidney trouble, catarrhal affections of the mucous membranes, liver ailments and impurities of the blood—and quickly restores proper action. Tonoline is being explained daily to many people at any good drug store.

Notice:—As tonoline is a wonderful flesh builder it should not be taken by any one not wishing to increase his weight ten pounds or more. Although many reports are received from those who have been benefited by tonoline in severe cases of stomach trouble and nervous dyspepsia, chronic constipation, etc.

FLOUR ADVANCES TO HIGH PRICE LEVELS

Chicago, Sept. 27.—The price of flour was advanced 20 cents a barrel Tuesday, the highest price level since the War Between the States. Standard Minnesota patents sold for \$9.10 a barrel, an increase of \$3 over a year ago.

The cheaper grades of flour sold to the bakers trade also was advanced 10 and 15 cents a barrel. Grades which Monday sold for \$8.50 brought \$8.60 and \$8.65 yesterday.

ADMIRAL VREELAND DEAD.

Retired Naval Officer Passes Away at Atlantic City.

Atlantic City, Sept. 27.—Rear Admiral Charles Edward Vreeland, U. S. N., retired, died at a hotel here today from heart disease. The body will be taken tomorrow to his late home in Washington, where funeral services will be held later in the week. Interment will be in the national cemetery at Arlington.

Rear Admiral Vreeland was a native of New Jersey. He was born March 10, 1852.

GRAIN DEALERS ELECT.

Jacksonville Man NAMED as Second Vice President.

Baltimore, Md., Sept. 27.—John D. Baker of Jacksonville, Fla., was elected second vice president of the Grain Dealers' National association at the closing session here today and

Keeps Her Children In Perfect Health

Dr. Caldwell's Syrup Pepsin the Family Laxative for Many Years.

Mrs. Aug. Doellefeld of Carlyle, Ill., recently wrote to Dr. Caldwell, at Monticello, Ill., that she has used Dr. Caldwell's Syrup Pepsin in her home for a number of years, and would not be without it, as with it she has been able to keep her four children in perfect health.

Dr. Caldwell's Syrup Pepsin is a combination of simple laxative herbs with pepsin that acts on the bowels in an easy, natural way, and regulates the action of this most important function. Nearly all the sickness to which children are subject is traceable to bowel inaction, and a mild, dependable laxative, such as Dr. Caldwell's Syrup Pepsin should have a place in every family medicine chest. It is pleasant to the taste and children like it, and take it readily, while it is equally effective for adults.

Dr. Caldwell's Syrup Pepsin is sold in drug stores everywhere for fifty cents a bottle. To avoid imitations and ineffective substitutes be sure you get Dr. Caldwell's Syrup

Pepsin. See that a facsimile of Dr. Caldwell's signature and his portrait appear on the yellow carton in which the bottle is packed. A trial bottle free of charge, can be obtained by writing to Dr. W. B. Caldwell, 455 Washington St., Monticello, Illinois.

New Treatment for Bronchitis, Asthma, Catarrh and Head Colds

Vick's "Vap-O-Rub" Salve Relieves by Inhalation and Absorption. No Dosing.

No need to take internal medicines or habit forming drugs for these troubles. When Vick's "Vap-O-Rub" Salve is applied to the heat of the body, soothing, medicated vapors are released that are inhaled all night long through the air passages to the lungs. In addition, Vick's is absorbed through the skin, relieving the tightness and soreness.

Vick's can be applied over the throat and chest and covered with a warm flannel cloth—or a little put up the nostrils—or melt a little in a spoon and inhale the vapors arising. Also for Asthma and Hay Fever, rub Vick's well over the spinal column to relax the nervous tension. 25c, 50c, or \$1.00.

VICK'S "VAPORUB" SALVE
